

SOLUTIONS FOR THE **AGRICULTURE & CONSTRUCTION EQUIPMENT INDUSTRY**

Protect from Weather & Rugged Treatment *With Sheboygan Paint Company High-Quality Coatings*

Those who work in the agriculture and construction industries expect equipment that can work and perform as hard as they do. Excavators, tractors, and other heavy-duty equipment face uniquely intense weather and treatment. Manufacturers of this equipment need a coating they can rely on to consistently protect their product and maintain its appearance, so they can deliver what their customers command.

Sheboygan Paint Company coatings can help manufacturers deliver products that work hard no matter the climate or conditions. With durable protection that can stand up to weather and action in all extremes, our water-borne and solvent-borne coating systems provide durable protection and high-gloss finishes. We can even custom-match color for the look your customers want. Our industry-leading epoxy primer and urethane topcoats surpass industry standards, competitor performance and our customers' specifications. In fact, when used with our solvent-based epoxy primer, **our Uraguard topcoat system resists corrosion for more than 5000 hours!**

We have researched, tested and perfected our coatings to withstand the harshest of environments. And, as a leading mid-sized coating company, we are nimble enough to make our customers a priority and powerful enough to provide the innovation and expertise needed to solve problems.

Attributes

- Fast Dry/Cure Time
- Low or No HAPs
- Economical
- Reproducible
- Corrosion & QUV Resistant
- Consistent Performance
- Exceptional Weatherability
- Excellent Coverage
- Brilliant Appearance
- Impact Resistant
- APEO & NPEO Free
- Easy to Use/Clean up
